Cloud Solution Developer
Joined Shadhin Lab as a Back-end Solution Developer in August 2022, which was established to serve cloud-native applications on AWS. It's focused on emerging technologies, especially serverless technologies.

PROJECTS

Beneficiary Training Management System (Department of Rural Development and Cooperatives)

🌐 https://btm.rdcd.gov.bd/

- Feature: RDCD(BTM) is a micro-service architecture-based web application built using Laravel framework and other modern web technologies like React.js, Blade templating engine, Bootstrap CSS, Queue, Payment gateway, API, and real-time notifications. It provides a comprehensive solution to delivery services for rural development and cooperative divisions in Bangladesh.

HR Connect - Human Resource Management Software

🌐 https://hrms-demo.divergenttechbd.com/login

- HR Connect is a Human Resource Management System (HRMS) developed using NestJS and PostgreSQL. It includes features like employee management, attendance tracking integrated with biometric devices, and payroll processing. The system also offers leave management, performance evaluations, and role-based access control for HR functions.

LANGUAGES & TECHNOLOGY

NodeJS (NestJS) | PHP | Python
MySQL | PostgreSQL | MSSQL
NextJS | Linux | Docker | Server-less
Amazon Web Service (AWS)

EDUCATION

B.Sc. Engg. in CSE
CGPA 3.6/4.00

📅 Dec 2017– March 2022

📍 Bangladesh Army University of Science And Technology, Saidpur Cantonment

HSC (DHAKA Board)
GPA-5.00/5.00

📅 2014–2016

📍 Adamjee Cantonment College, Dhaka

SSC (Jessore Board)
GPA-5.00/5.00 (Board Scholarship)

📅 2012–2014

📍 Allardarga Secondary School, Kushtia

ACHIEVEMENT

- **bdapps National Hackathon 2022**
  Champion in the bdapps National Hackathon where more than 1000+ team participate from different university. We secured the first place and won BDT 200k.

- **BAUST ACM-ICPC CLUB**
  Participate in Preliminary ACM-ICPC 2020, TeamName : BAUST_REBELS

TRAINING AND CERTIFICATIONS

- Cloud Management with AWS
  Basis Institute of Technology and Management (BITM)
  Certificate No: BASIS311/OID115/Cloud3/23

- AWS Fundamentals: Building Serverless Applications (Coursera)
  Credential ID:XETBNDRWCN2W

- Server-side Development with NodeJS, Express and MongoDB (Coursera)
  Credential ID:48AMJT7TBHMT

Mess Monitor - an app to track mess expense

🌐 PlayStore

- This is an app using Flutter and a Cloud-Based back-end.
- Feature: Using this application you can easily manage your mess without spending extra time or money. This application saves you valuable time and produces 100% accurate calculations. Using this app you can manage 'Daily Meal', 'Glossary Cost', 'Utilities Cost', 'Member Meal', 'Bazaar List', 'Members Money', and so on.
